[Healthy urban environment - Spatial Planning and Architecture](#)

In this course, we will discuss the urban environment through the lens of health, we will provide pills of basic knowledge and practical examples, mainly for architecture and engineering undergraduate students. The course, also, is adequate for practitioners interested in developing an understanding of healthy cities 'through an interdisciplinary approach.

[Healthy urban environment - Engineering](#)

This course is one out of two courses that discusses the themes of the healthy city through an interdisciplinary approach. It is designed to provide basic knowledge of the topic for architecture and engineering undergraduate students, but also for curious practitioners, interested in having a general overview of the various potential topics under the umbrella of healthy urban environments, which is the title of an EU funded project, under which this course was created.
